For 6 month 28,000+ GST.

Relevant, interactive content

The whole point of social media is to enable people to interact with each other, share ideas, feelings, pictures, videos, thoughts and so much more. By posting content that is relevant to your target audience, we are more likely to generate quality traffic & interest to your page. The more interest you get, the more likes / followers / fans you build. The bigger fan base you have, the easier it is to get your message out there. So, the key is to post interesting, relevant content, connect with your target audience and find out what matters to them. Also, we have the ability to set up a 'listening post'. We can join in important conversations at the right time, offering potential customers valuable information, just at the right time and truly connecting with the target audience.

Monitoring

Unlike many other social media management agencies, we actually monitor your page from 9AM until 5PM, Monday to Friday. If somebody asks a question, or comments on your wall, we will address it, whether that's 1 or 50 a day. We have our own bespoke software that enables us to monitor several accounts at the same time, ensuring your page is getting the focus and management it deserves.

Personal Account Manager

Each of our clients is assigned their own account manager. Somebody that is accountable for your social network accounts. Your account manager is concentrating on your account every day, all day, planning, scheduling relevant
